

Retrofit ring

RETROFIT RING

Many older boats were originally equipped with halogen reading lights with a large footprint on the wall. In order to cover up the marks on the wall during a retrofit, Båtsystem now offers a smart looking stainless steel ring to be placed onto the wall before adding one of our smaller lights. Thanks to the high gloss finish, this ring works perfectly together with our aluminium or chrome lights. It has a Båtsystem Logo on one side, so customers can choose either to boost about their new high-quality Båtsystem lights or to remain incognito by installing the ring the opposite way with the Logo facing the wall.

This essential ring has the chance to support sales for our newer lights with a smaller footprint.
